

Date: 1/4/2021

1. *Received Vaccines:*

CTSI received 100 Moderna vaccines as part of their Phase Ia distribution. In following OHA guidelines, the distribution is being given to healthcare workers/essential staff/TLC residents.

2. *Future Vaccines:*

- Phase Ia vaccines: 100 booster vaccines due to be received in January – date unknown.
- Future vaccine distribution: Date and quantity unknown.

3. *Vaccine Priority Groups:*

We continue to work on identifying the next phase of people to receive vaccinations; Oregon Health Authority offers guidance but tribes determine their own priority groups. However, our distribution quantity is based on the states priority groups.

The next group will be (subject to change due to quantity):

- Essential staff (to be determined)
- Siletz tribal members over age 65
- Siletz tribal members over age 55 with conditions that put them in high risk category.

Other priorities are (in no particular order):

- Siletz tribal members – age 18-54 with identified risk factors
- Siletz tribal members – no risk factors
- Siletz tribal members' non-native household members -by age and priority
- Other native patients - by age and priority
- Non-native patients – by age and priority
- CTSI business entities' staff

Chemawa Patients:

If you have tribal members that are active patients at WOSU and are 75+, they should call the front desk to schedule.

Will update as soon as we have dates/information. Please check CTSI website and the Clinic's Facebook page for the most up-to-date information.
